

# PNChp HIGH PRECISION POWER SUPPLY

## Output Voltage up to 300,000 Volts

### Universal High Precision HV Power Supplies up to 300,000 Volts

Ultra High Precision and voltages  
for numerous applications

The high-precision power supplies of the PNChp series achieve a ripple and stability of <0.001 % in voltage stabilization thanks to constructive measures, optimized circuits and careful selection of high-precision components.

Our long experience and our wide know-how in design and construction help us to achieve the best long-term stability of the PNChp series.

Already in the standard version the PNChp types offer a ripple and stability in the range of <0.001% in the voltage stabilization, in addition with a low temperature coefficient and an outstanding long-term stability.

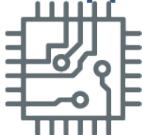

Especially with the highest quality requirements in manufacturing, the PNChp meets customer needs and is not only used for simple applications, but also for demanding development and research tasks in various technology and research areas, as well as for precise work in the semiconductor industry.

The PNChp Series is available for most of the PNC Series, ensuring consistent high accuracy regardless of the power supply power rating.

### PNChp-Series Highlights

- Low residual ripple of 10 ppm and excellent long term stability
- Continuous short circuit proof
- Reverse voltage proof
- HV on/off via push button or interface
- Output power up to 2,000 W
- Setting of the output values through 10-turn potentiometers, separately for voltage and current
